

LMC-Series Live Mixer

High quality control with the new **LMC mixer** series by Omnitronic. The mixers convince with their very solid workmanship, their warm and balanced sound (also thanks to British-style EQs) and their extensive equipment.

A compressor can be applied to each input channel (mic / line). The mic pre-amplifiers have high headrooms and dynamics. The integrated USB interface enables a quick recording of the session, for example in the home studio or rehearsal room. All three mixers are equipped with an effect unit, which offers faultless and variation-free resonance. 16 editable effects can be routed to single channels or buses, as well as to the master signal. The effect section also offers a tap function and storable user settings.

The series is especially suited for those, who prefer live mixers for smaller gigs with very manageable dimensions, variety and easy handling and also have an eye for the costs.

USB 19"

No. 10040280
OMNITRONIC LMC-1422FX USB Mixing Console

Professional audio mixer with British-style EQ, compressor, effect unit and USB interface

USB 19"
