
CobraNet Audio Network

Overview

- Developed by Peak Audio
- Real-time, high quality, uncompressed digital audio
- Using standard Ethernet packets and infrastructure
 - => works with any 100 Mbit, Multicast-enabled Ethernet devices
- Up to 64 channels in each direction over a single 100 meter CAT-5 cable (100 Mbit connection, 48 kHz, 20 bit)

- Advantages:
 - + **Cabling Cost**
 - + **Flexibility**
 - + **Reliability**
 - + **Audio Quality**

Omnitronic Transmitters: NAT-series

- AD / DA Conversion and connection to CobraNet

NAT-88

8 XLR Inputs
8 XLR Outputs

Omnitronic Processors: NAP-series

- Process the audio signals in DSPs using Effects

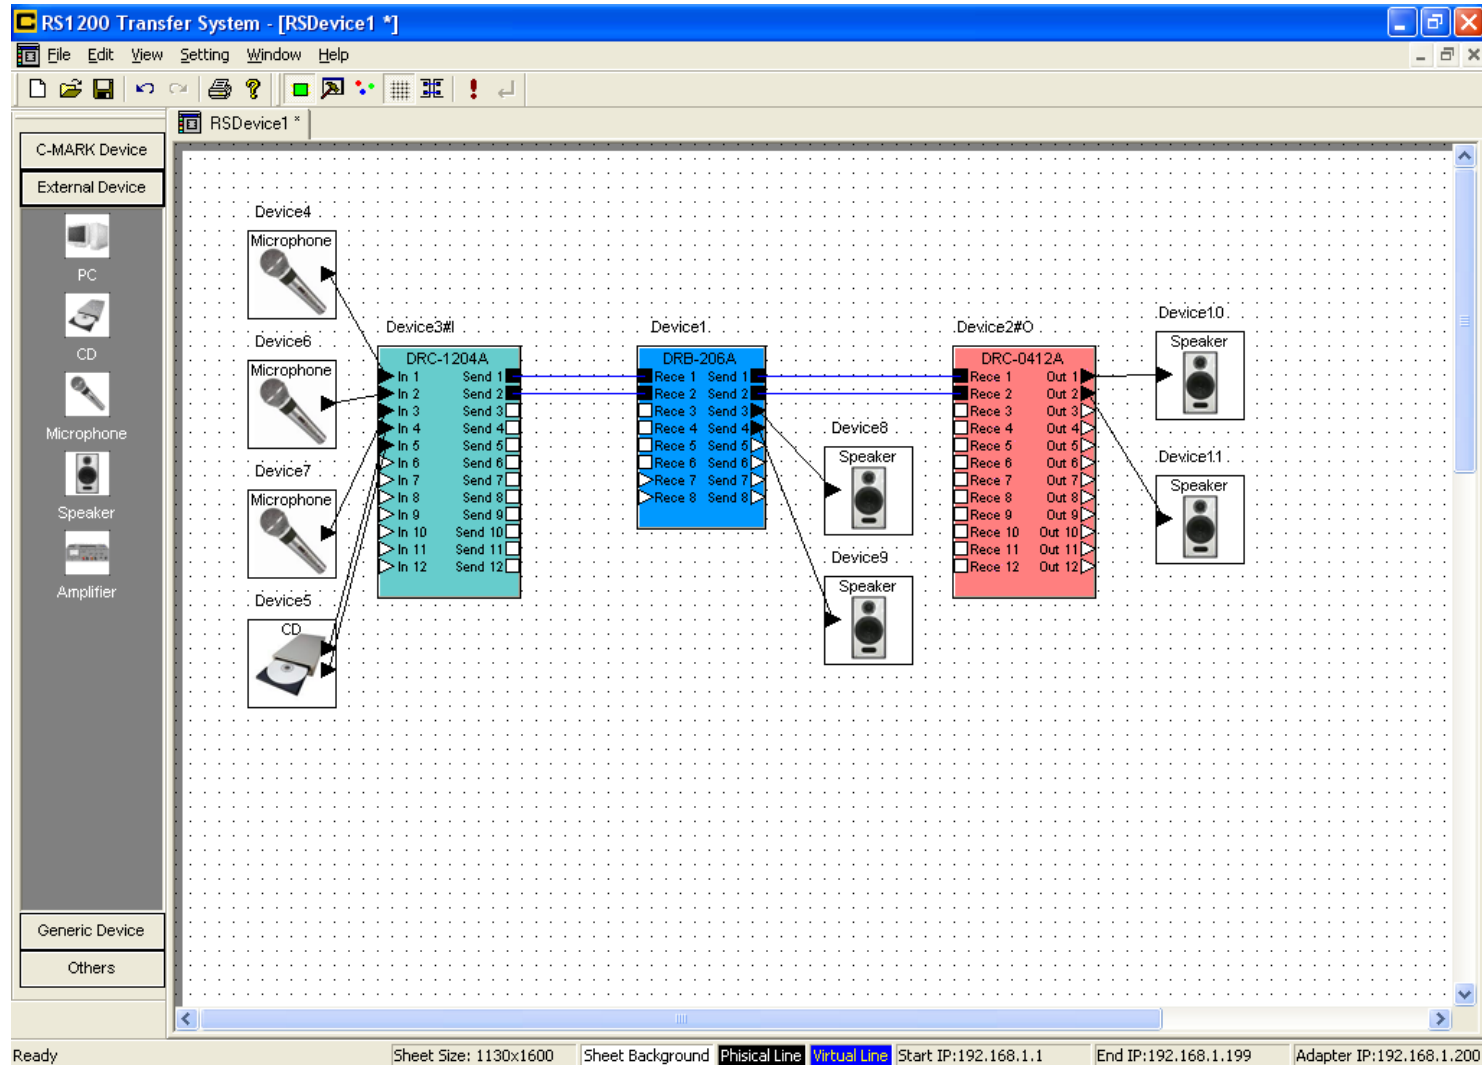

NAP-26

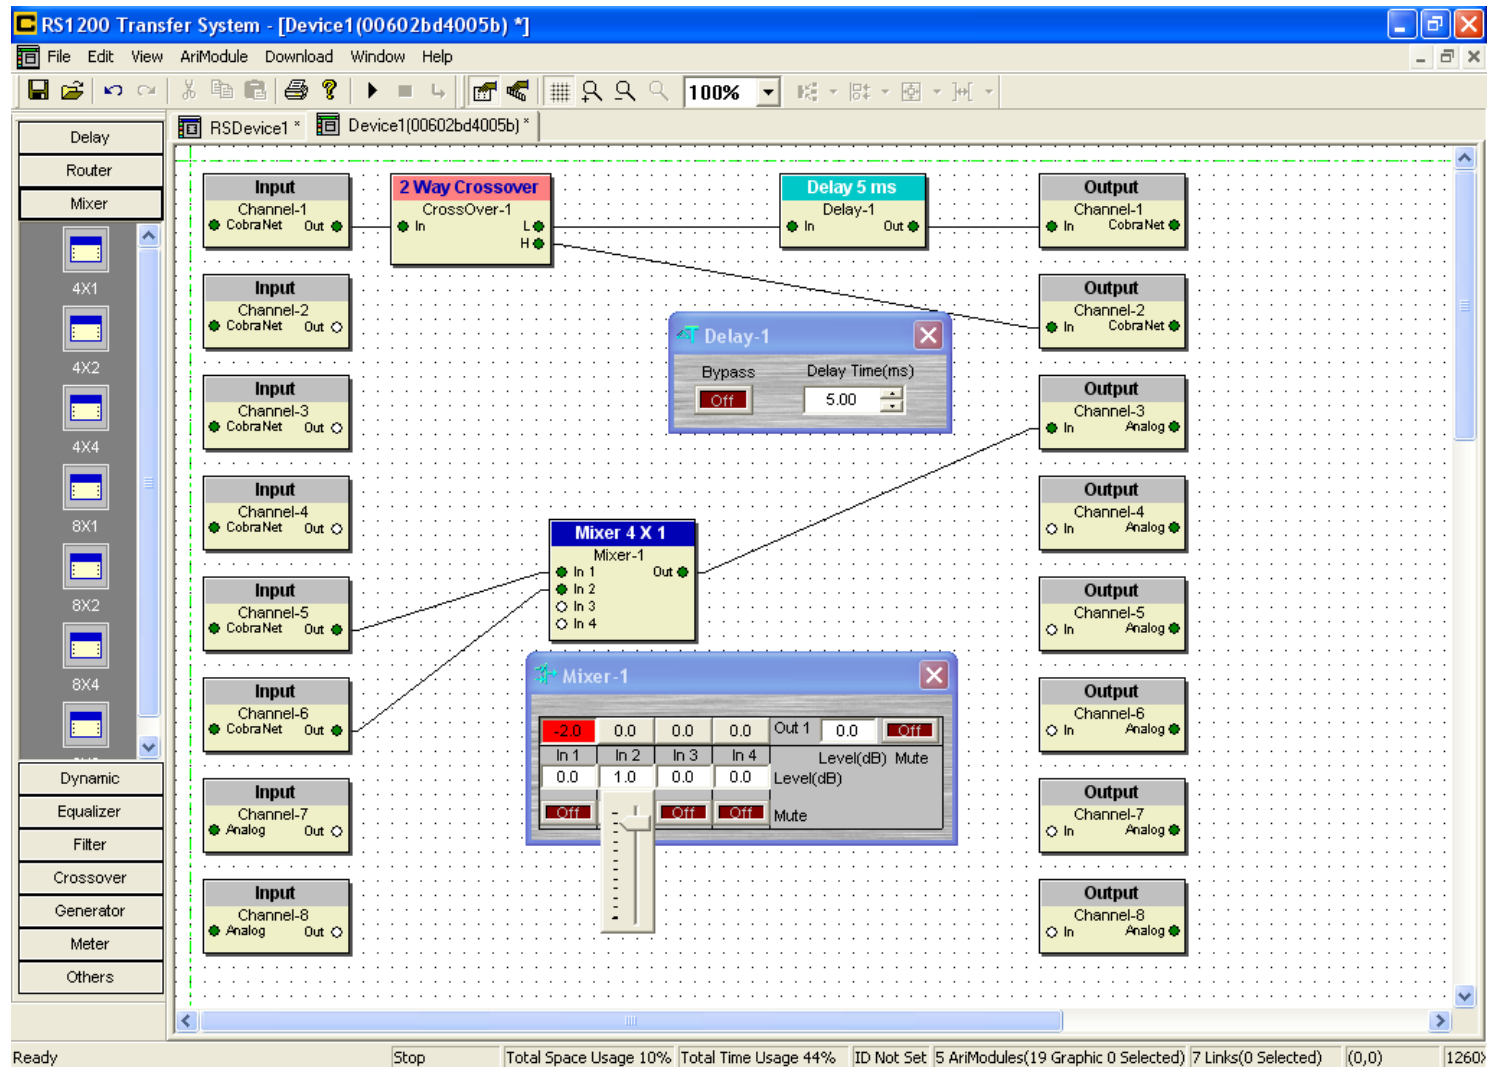

2 XLR Inputs
6 XLR Outputs

RS 1200 Software

- Wiring devices

- Wiring effects in DSPs

DSP Effects

- Dynamic
- Router
- Mixer
- Delay

- Crossover
- Filter
- Graphic Equalizer
