

## DD-5220L

In club life and music there may be some changes, but some things never change. Turntables still offer the best feel and are the standard especially with hip-hop DJs. The quartz-controlled direct drive of this ultra-torque turntable provides for an extremely high torque. This makes the DD-5220L a reliable and powerful tool for DJs – in clubs as well as on festival stages. Platter and motor are directly connected for highest stability. Vibrations and noises are reduced via rubber inserts and shock absorbing and vertically adjustable feet.

The output of the DD-5220L is switchable between phono and line. For easy maintenance and improved installation possibilities in cases, recessed connections for detachable RCA & grounding cables are provided.

Of course, the turntable also has standard features such as the LED stylus illumination, adjustable anti-skating, a height adjustable tone arm, three different speed levels, adjustable start and stop times as well as a reverse run.

No. 10603003
