

# MANAGE YOUR FREQUENCIES

**Relacart® HR-31S**  
TRUE DIVERSITY SYSTEM WITH  
REAL-TIME MONITORING AND  
DATA MANAGEMENT

- RWW is an intelligent and powerful software for remotely monitoring and controlling the HR-31 wireless microphone system in real-time.
- The software provides a convenient graphical user interface to display the RF spectrum and to set up free and compatible frequencies for multi-channel systems.
- The software can monitor the transmitter's battery status, AF/RF level and Antenna A/B strength.
- Multiple receivers can be linked and connected to a computer with the U485 USB interface.
- Remotely control up to 12 wireless receivers simultaneously (number is limited due to the frequency range used) from up to 300 meters away.

## HR-31S

### Wireless microphone system with PC control

The **HR-31S** is a premium true diversity system in the UHF spectrum that can fully exploit its strengths, in particular in connection with the RWW software. The transmission takes place either in the professional switchable band 731-790 MHz or in the license-free range 823-832 MHz. The other features also convince: quick setup via infrared and an exceptionally long service life of the transmitter from up to 15 hours on just one set of batteries.
