MagicEQ

UR-260D

System with DSP for microphone modeling and PC software

The UR-260D is a dual-channel true diversity UHF system with a host of innovative features. In addition to automatic frequency scanning for interference-free transmission, one also finds an intelligent feedback suppression system. With MagicEQ, various sound characteristics of world-known microphone capsules can be emulated or created by yourself. The presets can be changed from a computer via software - even during live operation.
