RELACART R-M1 Rack Mount Kit

Rack mounting set for 1 receiver unit

The **WAM-400** is a wireless, DSP-based conference system that subtly and automatically carries out a number of functions in the background. Thus, it is also suitable for environments without present technical personnel such as video conferencing, large meetings or public sessions. Voice signals are detected intelligently, feedback and background noise thus successfully prevented. The WAM-400 is very flexible thanks to numerous accessories.
