Read user manual before use. Only for professional use! Never exceed the maximum power output. For overhead use, always fit the fixture with an appropriate safety-ropes. Before installing a device on the ODD, make sure it is applicable for the desired mounting method! Only install device with an appropriate safety fixture (safety-eyelid or bracket with self-locking nut)! Isolate device from all poles of the mains supply before opening the housing or replacing the fuse. Maintenance and service operations only by authorized dealers.

Pull the safety-rope through the attachment eyelid!
