

PRO Slim Par

The Pro Slim Par series from Futurelight stands for professional technology without compromises. The spotlights have an extremely robust metal housing that also allows effective convection cooling. So there are no fans and therefore no noise and no dirt that gets inside. The power connections are via PowerCon or the compatible P-Con system and each spotlight also has a power out socket.

PRO Slim PAR-7 Hypno HCL

Here you not only get a professional spotlight that leaves nothing to be desired thanks to its color mixing with red, green, blue, amber, white and UV. The Pro Slim Par 7 Hypno HCL also has a ring of 144 SMD LEDs with RGB color mixing, a real eye-catcher. The LED ring can be controlled in 4 individual segments.

PRO Slim PAR-12 MK2 TCL

Do you need strong, trendy colors and do not want to do without professional quality? Then the PRO Slim Par-12 Mk2 TCL is just the right spot for you. Because even spotlights with few colors, like this slim par have their advantages. The LEDs are much cheaper yet each color has more power and therefore more brightness.

PRO Slim PAR-12 MK2 CW/WW/A

White all around! This spotlight is the absolute specialist when it comes to white light. It has 3in1 LEDs with the colors cool white, warm white and amber. Thus you can cover the whole spectrum. You can produce everything from very warm light of a candle to cool white daylight with 6000 Kelvin. And all this in very good quality with a CRI of about 80.
