

Low-level mobile stand for TV screens adjustable up to 65"

Up to 90° Tilt adjustment

Ref. PTR-25

Low-level mobile stand designed to display TV screens from 32 to 65 inches. Fits any screen with VESA standard hole size: max 800 x 500 mm.

Our mobile TV trolley for screens has a special mount which can be tilted using a metallic adjusting system, guaranteeing maximum resistance and stability. Its tilting regulation system allows fine adjustment to achieve optimum screen positioning. The screen can be positioned at the desired angle, from vertical to horizontal (offering multiple angle positions).

Its reduced height and tilting screen mount make this stand perfect for meeting rooms, presentations, museums, karaoke, for placing autocue screens on stages, also as a stand for the teleprompter in congresses and conferences and any situation where a screen is needed to be positioned at a low-level.

The base with double swivel wheels (2 with brakes) allows the screen to be wheeled from one room to another without having to dismantle it. Our PTR-25 mobile stand has a quick and easy installation with all necessary hardware included.
