

**Press Release** – March 19, 2010

## **Steinigke Showtechnic – Exhibition highlights 2010**

**It's Steinigke Showtechnic's 20<sup>th</sup> appearance at the Musikmesse and the prolight+sound respectively. Like every year, Frankfurt will see numerous product highlights. Here is a little preview.**

In the field of light technology it's more or less all about LEDs. No wonder, as the influence of the diodes is still growing. One of Futurelight's representatives: the EYE-60. This moving washlight is a more compact version of its flagship EYE-108 RGBW and offers high luminosity at a low weight and low energy consumption as well as trendsetting color mixing. A convincing tool for all professional light designers.

Futurelight's new DMH-2 LED moving head is also worth a look. The power of the 20 Watt diode is comparable to a discharge lamp with 250 Watts. Color reproduction is very precise, illustration stainless, dimming extremely soft and gobos perfectly match the illuminant. Moreover, the equipment includes a motorized focus and a 3-facet prism. This package plays in the champions league of LED spots of this kind.

Eurolite puts one focus on its KLS series and its LSD curtains. The former is completed by the KLS-800. This is a compact light system featuring, beside its small size and low weight, very powerful tri-color LEDs.

When it comes to flexibility the LSD (LED Soft Display) curtains are real masters as they can be bent around corners or pillars. Equipped with strong LEDs they are available with six different pixel pitches.

Now, let's enter the world of sound. Omnitronic welcomes all DJs with the two compact USB-MIDI-controllers TMC-1 and TMC-2. These devices come along with the versatile software Virtual DJ LE by Atomix Productions.

Based on the Compact Line Array (CLA) PSSO now introduces the Compact Speaker Array (CSA/CSK) which is suitable both for permanent installations and mobile use thanks to various versions and extensive accessories. If you want to find out more about the Line Array, just visit [www.i-love-sound.com](http://www.i-love-sound.com).

Apropos visiting: From March 24 to 27 you can pay us a visit in hall 11, stand A11 + A05. We would be very glad if we could show our novelties to you.
