Description:

Stage engineers know: every concert hall and every stage is different. And the routes can vary as well. So the basic settings of the speakers, the monitors and the sound have to be arranged again and again. To simplify this work, the professional SMP-152 Monitor processor gives a helping hand. Now, problems such as nasty feedbacks are all history, because feedbacks in particular, can be eliminated via a fully parametric 2-band equalizer. That does not sound bad!
