Description:

One device - many possibilities!

Just like mobile phones being a telephone, camera and organizer; our OMNITRONIC CL-266 combines various functions in one device. It is a compressor as well as a limiter, gate and peak. And that for very special reasons: to decrease blasting and to process, if appropriate, signals to guarantee a smooth flow of its chain. The CL-266 is adaptable from stereo- in two-channel mono operation and offers its numerous tuning possibilities, for example threshold-, ratio-, attack-, release- or level-compensator, separate for every channel. The very solid gadget, which is equipped with 1 unit, can be used technically as well as creatively for the intentional alteration of sounds.

Try it in your studio, home studio or in your club. You will be impressed with the result.
