DDI 4x4 interface

USB audio interface especially suitable for DJs

Art. No.: 10359850

GTIN: 4026397345520

Features:

- Plug&play audio interface connects line, phono and microphone inputs with your computer for recording and playback
- Suitable for digital mixing with customary DJ software and timecode CDs/vinyl
- Compatible with PC and Mac - no setup required
- High-resolution AD/DA converters (16 bits/ 44.1 kHz and 48 kHz) for high-end audio quality
- Incl. ASIO driver for ultra-low latency
- Line input (stereo RCA)
- Line/phono input (stereo RCA), switchable
- Microphone input (6.3 mm jack), adjustable
- Monitoring of the output signal via adjustable stereo headphone output (3.5 mm jack (1/8"))
- 2 line outputs (stereo RCA) for PA applications
- Signal LEDs for inputs and outputs and USB port
- Power supply via USB, no power adapter required
- Works with almost any recording software for PC and Mac
- ASIO driver for Windows 7 available in the manufacturer's download section
