Description:

Amplifier of unlimited possibilities!
Perhaps the MCS-1250's possibilities are not unlimited, but they are definitely numerous. Let's take a look at a locality that consists of several rooms for instance. Now, each room should have its own music, but due to space problems, only a compact and centrally located amplifier unit can be installed. Not an issue. The MCS-1250 offers the possibility to operate six zones simultaneously. Each zone is equipped with a controller that is able to separate the zones and to adjust them individually. So the volume, the basses and the heights can be set as required. Really a nice one!
