**The article is no longer in our assortment.**

### Description:

A unique delight for your ears!

To take true pleasure in the music, that is saved on an MP3 player, you should by any means, think of the proper headphones. It is no secret, that supplied headphones often can not reach high standard performances. The OMNITRONIC Nano Stereo Headphones do not only convince with their first class sound quality and their cheap price, they also offer the possibility of a wireless connection between player and phones. This is really unique on the market. The Headphones, available in white or black, are suited for the first and second generation of the iPod nano. Simply stick it into the designated holder and you can enjoy your music or audio book, immediately; just free your music. Of course, the phones can be used the "common" way with the also delivered cable, but once you have met the phones' strong points, you will forgo the cable by your own choice.

### Features:

- For iPod® Nano® first and second generation
- Optimal wearer-comfort due to cablefree use
- Simply insert the MP3-player into the holder, plug in - ready!
- Exquisit design
- With 40-mm-driver for excellent sound
- Large swivel and rotate angle
- Foldable earpieces for easy storage
- High-quality leather bag for safe transportation
- Closed air, dynamic stereo-headphones
- Excellent sound-features with powerful bass, transparent mid-range and brilliant treble
- Distortion-free playback also at a high volume
- Well-padded, adjustable harness
- Oversized earpieces for screening undesired noise
