### Description:

A real blind shell!

To trust someone blindly shows a distinctive naivety, doesn't it? In terms of our audience blinder it spoils nothing to say that this is indeed not the case, as it has numerous amenities which do vindicate absolute confidence. The most striking feature - beside its exceptionally quick and extremely bright light expansion - surely is its already installed dimmer, which does function manually via a dip switch. A clear advantage compared to many other Blinders, which have to have the dimmer attached as it is not integrated. The effect is designed for 4PAR-36 120V/650W lamps, and can be operated with two DMX-channels and mounted both on the ceiling as well as the traverse.
