## The article is no longer in our assortment.

#### **Description:**

#### Unchain your decoration!

What comes to your mind when you think about a light chain? Dark green cables with tiny candlelike lamps. Putting up the chain, at the latest, you get angry, because at least one lamp doesn't work. The worst case: the whole chain doesn't work. But with the LED technology, these annoyance belong to history. The LED garland, however, has an extraordinary durability, a minimal heat emission, and is more or less maintenance free. In addition, the chain's length is 26 meters, so you can easily light large areas or objects with that certain effect. Only boring white was yesterday, the LED garland is as well available in yellow, green, red or blue. It is up to you and how your decoration should look like. By the way, the classical white of this chain knows how to illuminate stylishly. So don't pigeonhole all light chains, concerning the quality there are clear differences. Whether for windows or Christmas trees, our garland is the right choice.
