Brighten up your surroundings!

Art. No.: 50808200

GTIN: 4026397227208

The article is no longer in our assortment.

Description:

As you like it!

Diesel or gasoline-powered: concerning car buying, you have to opt for one version. It is not possible to get both in just one car. In the field of illuminants, there sometimes are similar situations, for example when you have to decide between HQI-lamps or halogen burners. But this does not apply for our swivel-mounted, rotating and extendible RDL-70 recessed downlight. Because it offers two for one. So, the device can either be operated with a HQI-lamp with 70 Watts - a ballast resistor is required - or alternatively run by a halogen burner with up to 100 Watts. Whereas the burner, better suited for private use, can boast with advantages such as low costs or a long life, the HQI-lamp has a higher color temperature at its disposal and thus is often seen in fashion stores or the like.
