Description:

The Antari DarkFX Spot 670 is an efficient high-output and low-power consumption UV LED spot that delivers a peak wavelength of 365nm and radiant flux output of 6760 mW at full intensity with minimum visible light. This ensures all UV-reactive materials reflect perfectly with stunningly bright and vivid colors.

Equipped with 9 x 1.9 W high-power UV LEDs, it features a 15° narrow beam angle, flicker-free operation, and special optics to prevent wear degradation from high UV exposure. This IP20-rated LED spot comes with an aluminium housing with an adjustable brackets for versatile mounting options.

The DarkFX Spot 670 is operated in one of two modes: Either in DMX mode with 2 channels via the 5-pin XLR connectors or in stand-alone mode via the LCD display and the 4 operating buttons. Use the powerCON input to connect it to the mains.
