The article is no longer in our assortment.

Description:

Do it your way!

Why do we like sunsets and even refer to them as romantic? This is due to the fact that light, helps to create and support certain moods - just like music touches our senses. Warm colors can give us the feeling of security. Hence it's quite logical to deploy light as decoration or accentuation in many fields as possible. The LED TL tubelight therefor offers a perfect help. Simply made of insulated copper wire with directly fixed lamps, it offers immensely versatile usage. Whether for indirect illumination in frames, as heightened safety on stairs, on ceilings, walls, in colored ductworks and so forth. Almost unlimited possibilities. On a roll length of ca. 10 meters there is a space of 10cm between the warm-white LEDs (3000 K) - also available: cold-white with 6cm interval. Of course you can shorten the light chain at will and thus fit it to your very own requirements.

Features:

- One of the most important elements in decorative and effects illumination
- Insulated copper wire with directly fixed LEDs
- Long LED life
- Heightend safety on stairs
- For individual decorations (e.g. with colored tubing)
- When ordering please specify the following:
- LED voltage (12 V)
- LED distance (10 cm or 6 cm)
- Total length
- Required transformer
- Power consumption approx. 0.04 W per LED
