The article is no longer in our assortment.

Description:

It's getting hot in here! This effect projector produces amazingly real-looking flames onto walls or canvas. It is like a glimmering campfire. The speed of the blaze can be adjusted at the unit. Although its small angle of reflected beam, the FF-250 is able to perform extreme wide projections. We are dealing with a very special effect, best placed in fancy clubs or bars but also on exhibitions or not too formal receptions.
