

EUROLITE Mini single ball with 12V/7W

Newest additions to the mini light effect devices!

Art. No.: 51812231

GTIN: 4026397303490

The article is no longer in our assortment.

Description:

Small but select!

Tastes differ and so do requirements. Hence automakers for example, offer lorries, hardtops and subcompacts. After all they should be something for everyone. And of course this is also true for the illumination industry. But in this field, we distinguish between moving heads, bigger and smaller light effects. Our EUROLITE Mini single ball belongs to the last group mentioned and was therefore not constructed for large size clubs but rather for party rooms, mobile DJs and small discotheques. And might the measurements of this low power consumption device be in a manageable form however, the ball knows how to attract peoples' attention. Within one minute the ball housing rotates around its own axis 13 times and due to its colored, round vents, disperses the light in the room. A great mixture of diverse color points emerges and creates its very own atmosphere.

Features:

- The ball housing rotates around its own axis
- 13 rotations per minute
- Bright, intensive colors
- For standing installation
- Low power consumption
- For 1 x 12V/7W G-4 lamp (included in the delivery)
- Ready for use via enclosed power unit
- Ideal for party-rooms, small discotheques or mobile discotheques
