

FUTURELIGHT LED booster

Booster for LED Panel 60 x 60 cm

Art. No.: 51834110

GTIN: 4026397258417

The article is no longer in our assortment.

Description:

The energy supplier!
A marathon runner needs to refill his energy accumulation with some drinks from time to time, so he remains powerful even towards the end of a competition. This is somehow comparable to the voltage of a chain of 16 FUTURELIGHT PPP-60 and 16 FUTURELIGHT PS-144 Spots respectively, that needs a recharger as well. To prevent a drop, a booster that enforces the signal and helps with the power supply, should be installed. Without this procedure, computer operations would be influenced and not run properly. So when there is a row, where the separate components should flash one after another it might happen, that suddenly, two Panels or Spots burn simultaneously. But due to our booster your lights will not go on or off at the wrong time.

Features:

- For signal enforcement and new power supply
- Booster must be installed after every 16 PPP-60 panels, 16 WP-60 LED wall panels, 16 PS-144 spots, 16 CPS-144 spots

Logistic

EAN / GTIN: 4026397258417
