FUTURELIGHT ARC-M Control 512
Convenient architectural controller

Art. No.: 51834335
GTIN: 4026397193855

The article is no longer in our assortment.

Description:

Pretty little thing!
A light control in this form? Does one need that? Of course! Lets put the cart before the horse: If you are going for a walking tour, you are most likely to put your possessions in a rucksack and if you are going for a hotel vacation, you probably have a suitcase to carry your belongings. There are various means for good reason to serve the same purpose. In a metaphorical sense it also applies to light controls. Large control desks are used on stages, but for shops or the usage for architecture illuminating, these desks are not practicable as they are far too bulky. So what to do? Take the FUTURELIGHT ARC-M Control. Its new and especially designed for this special form of lighting and therefore totally handy. If we are taking the example of a shop where we want to draw attention to via lighting - it doesn't take much space and can be installed easily and unconspicuously on the wall, like a thermostat or a alarm system. From there, colors can be changed via 12 Hot Keys, desired sequences can be entered with a weekly timer. You see, quite good for something.
