Description:

Things only get better!
Higher, faster, farther. This demand applies for sports, but also for spots and moving lights respectively. So we try to develop our products constantly and thus optimize them for you. The best example is the PHW-260E. Due to its electronic ballast this device weighs three kilos less than its older Brother and shines even brighter. In addition to that, it possesses a lamp that does not flicker. A very interesting detail particularly for TV-shots, as the filmed light not seems to go an and off all the time - like other lamps like to do. The improved multi-function wash light is waiting for you!
