Description:

Not just another brick in the wall!

For hundreds of years pictures are put on walls, to smarten them up and to light up the atmosphere in a certain room. As a deco element as well as a eye catcher. Back then it was portraits or landscape art; these days and thanks to modern technic we are talking more and more about digital picture frames and screens, for example on stages or in clubs. With the FUTURELIGHT WP-60 however, you are having a new and amazing decoration capability available. Our panel is equipped with 288 LEDs and it influences the atmosphere due to its seven static colors as well as its multi-color effect. It hereby convinces as being a single dash of color in a hallway or lounge, or even through the connection of several units of large-scale installation which create amazing atmosphere on stages. The square arrays are the tool to the professional design of tomorrow.
