Description:

This LED derby effect by Eurolite transforms small and medium-sized rooms into an ocean of colors automatically adjusting to the rhythm of the music.

The Mini D-20 can either be controlled via stand-alone mode or connected to a DMX controller. In either way, the high-performance RGBW LEDs even cut through smoky air which makes this derby effect perfectly suitable for light shows of any kind, be it a presentation at a trade fair, a party in a club or a private party. You can choose from multiple different programs such as static colors, sound-controlled lighting effects and rapid strobe effects and more!

The low energy consumption, the long life of each diode and the low heat development are the main benefits of the LED technology. If you do not own a DMX controller, you can also use the supplied IR remote control to coordinate your show. Using the feed-through output to link up to eight fixtures to illuminate a wider area is also an option.
