

EUROLITE LED RV-3x3 Beam effect

Room-filling RGB effect with LED technology

Art. No.: 51918521

GTIN: 4026397381436

The article is no longer in our assortment.

Description:

Another classic with LED!

There are plenty beam effects. And from time to time they are alike. But there is one attribute, which can be clearly distinguished. The illuminant. Our RV-3x 3 has three LEDs (3 Watt) thus representing another spot which is the heir of a conventional colleague with discharge bulb. That's what many classics have to go through. But there's no need for sorrow now as the new technology finally offers a bunch of benefits. What does this mean for the RV-3x 3? Well, this means that it doesn't need much electricity although it is really powerful. And due to the the long life expectancy, maintenance is almost buried in oblivion. So lay back and watch the red, green and blue beams exit the six lenses and fulfill their circular movements - they will stay with you for a long time.

Features:

- Beams exit from 6 lenses, perform a circular movement and change the direction of movement at every bass beat
- Sound-controlled via built-in microphone
- Microphone sensitivity adjustable via rotary control
- Easy installation via mounting bracket
- Equipped with 3 x 3 W LEDs: red, green, blue
- Ready for connection with power cord and safety-plug
- Advantages of LED technology: long life of the LEDs, low power consumption, minimal heat emission, defacto maintenance free with brilliant light radiation
