

EUROLITE LED DMF-4 Flower effect

Double LED flower effect

Art. No.: 51918560

GTIN: 4026397318241

The article is no longer in our assortment.

Description:

Two are better than one!

Actually, most flower effects can already convince as soloists. Now, if several devices are installed abreast, you can imagine the impression to be many times higher and the effect to be even more impressive. Based on this position, our EUROLITE LED DMF-4 was developed. Two hearts, so to speak, in just one device. Because the 94 diodes split to two orifices and thus create two flower effects at the same time. And the result is really respectable. Not only do the 5mm LEDs show a particularly bright illuminating power, the twice produced patterns change their position with every bass-beat and hence coddle the eyes in a very special way. So why only on flower when you get two with our DMF-4?

Features:

- The flower beams change their direction with every bass beat
- Sound controlled via built-in microphone
- Innumerable uses
- Perfect in public places, main halls, stages, lounges
- Ready for connection with power cord and safety plug
- Particularly bright illuminating power of the 5mm LEDs
- Advantages of LED technology: long life of the LEDs, low power consumption, minimal heat emission, defacto maintenance free with brilliant light radiation

Technical specifications:

Power supply:

230 V AC, 50 Hz
