

EUROLITE LED TWS-10 Flower effect

Low-priced compact flower effect with LED technology

Art. No.: 51918680

GTIN: 4026397327748

The article is no longer in our assortment.

Description:

Not like all the others!

Without a doubt, our LED TWS-10 is a flower, but it is definitely not common at all. It can be compared to a certain car that, with more than a standard package, changes from an ordinary into a very special vehicle and thus rises into a higher category. Concerning our light effect, it is the equipment as well, that draws the distinction. Because due to the 52 LEDs that split to two orifices, it is not only one flower, it is two flowers in one device. But there is more than that: with every bass-beat, the flower effects are deflected by two mirrors and hence change their directions. As you can see, this device can perform much more than the usual suspects and can be used in innumerable ways.

Features:

- Sound-controlled mirror deflection
- The mirror and the flower effect changes direction with every bass beat
- Brilliant flower beams
- Sound-controlled via built-in microphone
- Innumerable uses
- Perfect in public places, main halls, stages, lounges
- Ready for connection with power cord and safety plug
- Particularly bright illuminating power of the 5 mm LEDs
- Advantages of LED technology: long life of the LEDs, low power consumption, minimal heat emission, defacto maintenance free with brilliant light radiation
