Telescopic arm with XLR cable, can be mounted onto tabletops

Art. No.: 60006010

GTIN: 4026397386431

The article is no longer in our assortment.

Description:

Easy recording!

Just think of a typical workday of a radio DJ. While on air, he usually sits at a table in front of a computer and talks into a microphone. In general, this micro is attached to a table-microphone-arm as it is presented here. But not only radio DJs can take advantage of the arm - the height is universally adjustable from 43 to 104 cm - in recording studios and at multimedia workplaces the arm, that is delivered in black or white and with a thread hold, is a solid support.

Logistic

EAN / GTIN: 4026397386431

Weight: 1,67 kg
