Description:

Orchids can be used to create targeted exotic color accents in living and business areas, especially when decorating windows and counters. One of the best-known representatives - the butterfly orchid - served as a natural model here:

The arrangement consists of two flower stems of different lengths with purple flowers and flower buds. The flowers feel waxy to the touch, making it hard to tell the difference from the real plant. Leaves made of EVA material, aerial roots and a cover of artificial moss complete the lifelike appearance. Unlike its natural model, the artificial orchid will not resent any mistakes in care or location. Slightly bent, the artificial plant reaches a total height of about 45 cm.

Your decoration ideas can be implemented in no time, because the noble black decorative pot is already included.
