## **Description:**

The real papyrus is a plant species of the Cyprus grass family. In ancient times it served as an important raw material for the production of scrolls or as a building material. Nowadays, it is one of the most popular ornamental grasses. In contrast to its real role model, which requires very demanding care and reacts very sensitively to any omission, the papyrus of Europalms is completely undemanding. As the ornamental grass is made entirely of PE, it can also be placed in sheltered outdoor areas. It is available in different sizes.

Whether for the design of office, practice, wellness, business premises or in the private sectorit is always an impressive eye-catcher.

Included in the delivery is a basic gardener's pot, which gives the plant a stable stand when placed in a planter.
