Description:

These artificial grapes are a special eye-catcher: they always look fresh and cannot go bad. Whether as seasonal table decoration, part of autumnal arrangements and flower arrangements or decoration for motto parties - the grapes are ideally suited to support the presentation of products in vintner shops, restaurants and shops. Also in the private living area they complement your autumnal decoration.

The use of soft plastic makes Europalms' lush grape panicles particularly realistic and hard to distinguish from their real counterparts.
