Description:

This animated dragon figure from Europalms will complete your Halloween or theme party decorations:

Based on the well-known images from mythology, the dragon keeps an eye out for prey with its mouth wide open. To get a better view of his surroundings, he moves his head to the left and right. At the same time, its wings perform animated flight movements with a respectable range of up to 120 cm - which means that sufficient freedom of movement should be ensured here. An eerie sound and sharp loud screams can be heard, while a red LED flashes in each of his eyes. Thin nylon cords serve as suspension.

The animation of the decorative figure can be activated via an integrated microphone, the "Step here" switch pad or wired, manual control.

The energy supply of the dragon can be done via battery operation, USB-A cable for 5 V operation via power bank or power supply unit.
