Description:

Save reasonably!

Environmentalism and energy saving are important issues today. Energy saving lamps consume 80% less energy and live up to 15 times longer than conventional light bulbs. You just knew energy saving lamps for your living room lighting? But now you can also shift to energy saving lamps for professional lighting in the field of event technology. A new version of the classic PAR-56 with E-27 base can be used with every appropriate energy saving illuminant up to 105 W. At the same time the energy saver are only little more expensive than the budget-priced PAR Spots. And you should not forget that you will save energy as well as lamps and thereby money. This investment is worth it - for the environment and for your own pocket.

Caractéristiques:

- Can be used with any appropriate energy saving illuminant up to 105W having an E-27 base
- Rugged aluminum housing
- Strong aluminum mounting bracket with hole for fixing the obligatory safety rope
- Built-in reflector for optimal luminous yield
- Delivered with color filter frame
- Heat-resistant fixing screw
- The screw is protected against turning it too far out
- 4 clip-to-hold clamps with spring locks for comfortable opening of the color filter frame
- Comes fully wired with black silicone cable, stable earthing in the housing, directly clamped ceramic socket and safety plug
- With strong cable tension relief
- Available in alu and black
