Description:

MANUAL VIDEO SWITCH 2:1

The LVH-7 is the ideal choice in installations where either a manual switch or an open-collector must switch video signals. The LVH-7 utilizes a high quality RF relay to switch one of two video sources to one output or two video sources to a single video destination. To control the LVH-7 you need the LVH-8 with open collector output or relay contacts on any other equipment. The unit is compatible with NTSC and PAL systems.
