Description:

The rubber tree - botanically *Ficus elastica* - is experiencing its revival as an indoor plant: its elegant growth form combined with large, shiny, wide-oval leaves adds a tropical accent even to soberly furnished offices and living rooms.

In contrast to the real rubber tree, this artificial alternative from Europalms does not resent difficult lighting conditions or draughts.

During the production of the artificial plant, great importance was attached to natural details, such as the typical reddish petals, which protectively wrap the young leaves of the plant.

The artificial rubber tree has a height of 120 cm and is delivered in a black gardeners' pot, which supports the plant when put in a bigger decorative pot.
