Description:

Who dares to enter?

Although the two pumpkins at the entrance of the portal have put their kindest smile on, high above the entrance a poison green spider is lurking already for the first prey. Especially the smallest visitors must gather all their courage to cross the archway, as this is additionally surrounded by 3 dangerous-looking ghosts.

But when succeeded, the party can begin - the witches' cauldron is at least well filled. In addition, a special effect is established by the illumination of the ghosts, 1 pumpkin, the spider and the archway by cool white LEDs discreetly from the inside.

The IP44 protection class - splash-proof - enables easy installation in sheltered outdoor areas.

It's easy like that:

For operation permanently connect the ensemble to the power supply via a 1.70 m long supply cable. It then inflates on its own to its full size.

For a stable stand always attach and fix the enclosed anchoring cords at ground level as well as halfway up the archway pillars.

After the season, the scene can be folded again to save space and wait for their next deployment.

Caractéristiques:

- Mighty Halloween portal in bold colors
- Figurine blanc lumineux
- Assemblage simple
- Auto-gonflable
- Faible encombrement pour le stockage

Logistique
