Description:

Are you looking for a friendly Halloween decoration without a big scary factor? Then the witch hat set from Europalms illuminated by LEDs is the ideal accessory for your event.

The three decorative hats are made of semi-transparent material and can be easily hung up with a convenient loop. Even though the little ghosts on the black hat look a bit spooky, nobody has to be afraid of them. An LED underneath the tip of the hat can be turned on or off as needed.

The two pointed hats in orange and green are each decorated by a black hatband with a silver buckle. An LED light chain with eight multicolor LEDs serves as the interior lighting. These automatically run running light effects and color sequences.

The lighting effects are operated via an ON/OFF switch on the battery compartment or by wired, manual control.

Caractéristiques:

- Multicolore lumineux
- Assemblage simple
- L'étendue des fournitures**
- 3 x élément de décoration, 9 x batterie

Données techniques:

Alimentation électrique: 4,5 V CC
