Descrizione :

A macabre addition to any Halloween scene. Whether as an eye-catcher in the entrance area, as an eerie prop in a haunted house or as a gruesome shocker at a Halloween party: the "coffin of horror" will send chills down your spine and leave no one unimpressed.

Creaking wood and eerie shadows - this coffin hides a dark secret. Once perhaps the final resting place of a criminal, it is now anything but silent. Its rotten boards are riddled with cracks and crevices, as if something had tried to break free from inside with unbridled force. However, two massive chains in the upper area seem to hold back the horror - but is the first impression deceptive? When the animation is activated, the coffin comes to life. A plaintive moan and cries emanate from its interior, while a bony hand reaches through one of the holes in the lid - groping, searching, ready to grab any unwary visitor. At the same time, two eyes peer out through further openings, dimly lit to ominous life.

The animation of the Halloween decoration is activated by an integrated microphone or wired control.
